## 1 Project: YOUR PROJECT TITLE

by Max Mustermann, Matrikel #

delete me:

- please don't forget to put your name and Matrikel #. Otherwise we cannot sort that to the right
- please do one project per person. group projects will be not allowed
- submit the project on the molecular nanophotonics course pages

### 1.1 Introduction

delete me:

Please write here an introduction about your project. Describe the topic and why you chose to work on it.

### 1.2 Fundamentals

delete me:

add some fundamentals, which are required to understand the topic. This could be drawings, text or equations.

### 1.3 Results and Discussion

delete me:

- Please do all calculation for your project here including a discussion of the meaning of the results.
- The discussion is important! You should describe what the results mean, even if you think it is obvious.
- I will give most of the credit to the discussion
- Also note that all diagrams require axes labels and tick labels with an appropriate size.

### 1.4 Summary

delete me:

This is just the summary. Sounds that easy, but you should return to what you have stated as a goal in the introduction.
